

PS 12B / APPENDIX K SORBENT TRAPS

LONG TERM MONITORING TRAPS

- Ohio Lumex Appendix K traps are specially made for long term (7 + days) sampling.
- Third section is pre-spiked with elemental Hg at any customized level.
- Typically customized specifically to the stack conditions of the source.
- More than 30 sources are currently using our Appendix K traps for continuous monitoring and reporting.
- Zero “break-through” and high spike recoveries for extended test periods in “wet” and “dry” stack conditions.

SORBENT TRAPS MADE TO YOUR SPECIFICATIONS

Ohio Lumex Sorbent Traps are backed with 15 years of experience in mercury measurement and extensive field testing. Throughout our years we have learned that no two sources are the same. Some require a custom sorbent trap solution, but it doesn't cost you any more. Try us out!

You are GUARANTEED to succeed with Ohio Lumex Sorbent Traps!

simplifying Hg

Performance Specification 12B allows for the Cement Industry to use Sorbent Traps as a Continuous Emissions Mercury Monitor and report the results. This method is the most cost effective way to measure mercury, avoid public outcry since results are averaged over time, and enjoy less maintenance headaches.
