OHIO LUMEX
ON-SITE
Laboratory Services

Our **ON-SITE** Group can come on-site and provide immediate sorbent trap analysis in a matter of seconds. This service provides clients with the option of adjusting sampling procedures in order to pass the test without having to wait weeks for a lab to return your results. At Ohio Lumex, we do what we are best at! We bring our analyzer on-site, assemble it, and bring spare parts and sorbent traps at various levels. We analyze the traps and perform the calculations even before your next run. This is the most cost effective way to ensure that your sorbent traps are analyzed properly and your stack test is passed in no time.

- Analyzer is easy to transport and assemble and requires minimal space
- Sorbent traps can be altered on-site to meet unknown stack conditions
- Immediate results and calculations in a matter of seconds allow you to determine the outcome of the test run before your next sample run
- Proven and reliable technology

ON-SITE Mercury Analysis

WE BRING THE LAB TO YOU

We Can Provide On-Site Sorbent Trap Analysis alongside a Stack Testing Firm
Proven, Precise, and Widely Used RA-915+ Technology
In-The-Field Training and Analysis

SERVICES

- WE BRING THE ANALYZER ON-SITE AND SET IT UP
- PROVIDE IMMEDIATE RESULTS ALLOWING THE TESTING PROCESS TO BE MODIFIED IF NEEDED
- LOW POWER, AIR, AND SPACE REQUIREMENTS
- WE BRING SPARE PARTS WITH US
- WILL TRAVEL NATIONWIDE

At Ohio Lumex, we are the experts! Hundreds of sorbent traps come in every week to our lab for analysis, but we know there is a value for on-site field recoveries right there during your testing. We can come to you and in conjunction with a stack testing firm; you will have the specialists on board to help you pass, interpret your results, and troubleshoot if necessary. With 15 years of pedigree in mercury analysis, we have seen it all, analyzed it all, and have the expertise to make sure you are successful. For just a little more than the cost of a weekly rental, you will save valuable time and increase the efficiency of your testing. For stack testers who want to become experts by purchasing an analyzer, have us accompany you on the first test, train you right in the field, and certify you!

take advantage of our experience and let us bring the laboratory to you

GUARENTEED PERFORMANCE

The RA-915+ Analyzer has proven and precise technology used widely throughout the industry. With this analyzer we can measure samples on-site and provide immediate and reliable results in a matter of seconds, even before you begin your next test run. Take the uncertainty out of your mercury testing and allow us to provide you with one of our experienced technicians to handle all your sorbent trap analysis on-site.

EXPERTISE IN THE FIELD

With the ability to maintain the same quality control and quality assurance standards as we do in the lab, you can be sure your results will be accurate and reliable. In the case of a failed test run, our expert technicians can provide you with immediate feedback and guidance to ensure that your next run is successful.

CUSTOM SOLUTIONS

We can provide sorbent traps to meet any stack conditions. In case your Hg concentrations have changed, we always bring extra traps at various levels. We can also alter any traps right in the field to meet unexpected stack conditions.

WE HANDLE ANALYSIS, YOU DO THE SAMPLING

Don't hesitate to bid on projects that require on-site analysis if you don't have an Ohio Lumex Analyzer. Let us do the analysis portion of the test while you do the sampling. We strongly recommend working with a reliable and reputable stack tester, even though we are the experts in mercury analysis and sorbent traps, we are not stack testers.

RESULTS

Immediate and reliable results provide the option to perform multiple test runs in a short period of time and alter test conditions to ensure a successful outcome.

Date	Time	Sample	Result	Unit
10/10/2013	10:00	101	0.00	ug/m3
10/10/2013	10:05	102	0.00	ug/m3
